

March 23, 2020

At Community Waste Disposal, we care about the safety of our employees and our customers. As trash and recycling service continues, we focus on encouraging our employees to wash their hands regularly, cover their skin, and stay home when they're sick.

I am asking you, the City/Town, to assist in promoting safe disposal practices. Please post this information on your website and distribute on all available social media.

To help keep the potential spread of contamination to a minimum, please take the time to ensure ALL TRASH is BAGGED AND TIED before it gets thrown in your cart. By doing this, you are not only keeping stray trash from escaping your cart and from our trucks, but you are helping to ensure you, your family, your neighbors, and your trash collectors do not come in contact with potentially contaminated items.

Additionally, sanitize your trash and recycling cart handle(s) prior to and after service. If you are possibly infected, wait four (4) days before setting out trash and recyclables for collection.

As always, recyclables should be empty and clean prior to throwing them directly into your blue recycling cart.

We thank you for your business!

Sincerely,

A handwritten signature in blue ink that reads "Greg Roemer". The signature is fluid and cursive, with the first name "Greg" and last name "Roemer" clearly distinguishable.

Greg Roemer, President
